Those to be Tried at Taloga Charged With Murdering

HIS OLD FRIEND MAC OF D

Martin Christian Confesses the Murder of His Father.

Enid, O. T., May 10 .- (Special.) -- Judge John L. McAtee passed through the city route for Weatherford, from which terminal point he and J. P. Renshaw, clerk, together with others connected with the court, will drive overland fifty miles to Taloga, the county seat of Dewey county, which has recently been added to the Fifth district. The Dewey county term, which began today, will be of more than usual importance. The men accused of which the genuine Syrup of Figs has murdering W. G. McDonald ("Me of D."). the best known pioneer of western Oklahoma, will be trad, with Hon. D. T. Flynn leading the prosecution. Three other murder trials, besides several United States criminal cases, are on the docket.

MARTIN CHRISTIAN CONFESSES To the Murder of His Father and Implicates a Man Named Hodge.

Guthrie, O. T., May 16 .- (Special.) -Mar tin Christian, who is now in Juli at Taloga, Dewey county, has confessed to the murder of his father, N. M. Christian. The boy was arrested four weeks ago in Sherman, Texas, and on being taken to the scene of the crime confessed freely and fully and upon the confession a man named Hodge was immediately arrested According to the confesion Hodge and the boy arranged to kill old man Christian and secure his herd of cattle. Hodge was to receive twenty head of steers for doing the bloody work. On the 31st of March the boy and Hodge met at a water hole on Christian's ranch, knowing the old man would come there in the evening. When the elder Christian arrived the boy told him there was a steer up the guich that needed attention and they would go then headed for the guich and when in a dark ravine Hodge, the boy says, drew a revolver and began firing on old man Christian, firing four shots into the old man before he fell from the saddle, and then dismounted and put a bullet through relatives in Sherman, Texas, and Hodge dwelt in the neighborhood in security until the awful, unnatural crime. Both are in

A man ought not to feel old, or to be old-ntil well up towards the nineties, but ow-a-days you don't see many such men-istead, you hear people no older than 40 far who hears to such a such seems to the seems to seem to the seems to see the seems to seem to the seems to see th or 45 who begin to complain of tired backs

They forget that money is inst worthless without health to enjoy If men and women will take Dr. Pierce it. If men and women will take Dr. rierce's Golden Medical Discovery, they needn't worry much about old age. The years will go by, but they won't show it. This medicine makes digestion perfect, and changes a disordered stomach into a healthy one that works as Nature intended. It regulates the liver, enriches the blood and tones the perces. It recents consumption by cutting

It prevents consumption by curing itis, linguring coughs and bleeding lungs. The "Discovery" contains no al-cohol; no false or uncertain stimulus, the power it gives is the power of Nature, deep, genuine and lasting. It does not create a craving for stimulants. In sections cases of sickness, Dr. R. V. Pierce, Buffalo, N. V. will give free advice and counsel to those

"The reason I delayed writing was because I "The reason I delayed writing was beening I wanted to wait our year after I had taken the medicine before giving my statement, and mow I can send a good conscientious testimonial." writes Chas. H. Sergenat, of Phint Chy. Madhoot Co., Ohio. "During the summer and full of rise. I became all translawn," nerves and stomach were out of order. I wrote to Dr. Bierce for advice. He said I had general debility, and advised Dr. Pierce's Golden Medical Discovery, and I used as bottles. Since I stupped taking it about one year ago. I have not taken any medicine of any kind, and have been able to work every day. used six bottles. Since I stupped taking it about one year ago. I have not taken any medicine of any kind and have been able to work every day. Myappetite is good, Kan eat three square meals a day, and I do not feel that miserable burning in the stomach after eating."

Humboid:

THE EXCELLENCE OF SYRUP OF FIGS is due not only to the originality and simplicity of the combination, but also to the care and skill with which it is manufactured by scientific processes known to the California Fig Syrup Co. only, and we wish to impress upon all the importance of purchasing the true and original remedy. As the genuine Syrup of Figs is manufactured by the California Fig Syrup Co. only, a knowledge of that fact will assist one in avoiding the worthless

imitations manufactured by other parties. The high standing of the CALI-FORNIA FIG SYRUP Co. with the medical profession, and the satisfaction given to millions of families, makes the name of the Company a guaranty of the excellence of its remedy. It is far in advance of all other laxatives, as it acts on the kidneys, liver and bowels without irritating or weakening them, and it does not gripe nor nauseate. In order to get its beneficial effects, please remember the name of the Company -

Science Has Shown That the Malady Is Contagious.

DISEASE ATTACKS TREES

How Microbes and White Corpuscles Fight It Out.

New York, May 10 .- Thanks tothat constant source of knowledge, the microscope, two discoveries of more than the usual importance and interest were made by scientlats during last week. In Paris Dr. Bra succeeded in isolating and rendering visthie the microbe of that dreaded disease, cancer, while in India another physician Dr. Ronald Ross, was able to watch a battle to the death between a buglarious microbe in the shape of the plasmodium of malaria and one of the policemen of the human body, a phagocyte, or white blood

From these two interesting, but to the ay mind unimportant, schlevements, great things are predicted by bacteriologists and investigators. The discovery of the specific microbe of cancer, it is declared, heralds the elaboration of an anti-roxin which will cure that disease. Work has already been done alone this line, and some measure of success has been at-

The fight between the microbe and the chagocyte, or bacillus killer, which Dr. Ross watched, proved conclusively the truth of what before had been but a heory-that the white corpsucle in the blood of man was there to protect the body against disease, to kill microbes, and o feed upon the bodies of those it killed. The result of this certainty is that future methods of treatment for all germ diseases, notably such as consumption and typhold, will all be directed to the increase of the phagocytes and their strengthening. In addition, by showing the exact method by which the white corpuscle overthrows the microbe, it has confirmed curacy of a new treatment of cancer. The phagocyte kills the microne by surrounding and ultimately englobing it, What is known as the yeasts, or ferment treatment of germ diseases, is intended to set free in the blood organisms which, it has been demonstrated, are able to surround and englobe any hurtful bacilli they

Dr. Bra, who has discovered the microbe of cancer, has, however, added rather a new terror to the disease, for he is solentifically known as careinoma, is not Louis. says he has found out that the cancer germ grows upon trees in the form of a minute fungus, or lichen.

This discovery was first made by Jules Charpentier, a medical student, who has been helping Dr. Bra in his labratory work. Further investigation by the more experienced investigator only confirmed

the opinion of his assistant, So convinced did Dr. Bra become that the theory of his young assistant was correct that he advised him to write a thesis upon the subject. In collaboration the scientists now announce that the cancer is n disease which affects trees and plants

equally with human beings. Trees affected with cancer have been pointed out and the growths have been the same into countles which contain as register of deeds' office a warranty deed growths there is one particular house in near as possible, not less than 300 square | for the Southern Kansas railway to the which no less than five persons have died

> Bacteriologists use many animals for the of property. There were also filed two development and culture of the germs of mertgages. The general mortgage makes disease. Some microbes will only grow ourse bonds to the amount of \$100,020,000, serum. Others, again, can only be grown upon pieces of potato, on which they show and secures practically about \$14,884,666 as a sort of mould. There are many additional. Altogether the recording fees which cannot be grown in the air at all on these instruments amount to \$67.25, they are known as the anaerobic microbes and will hustle one man to record them in and can only be cultivated in such atmos phere as that furnished by hydrogen gas.

All these methods and divices were tried by the French scient sts when they began to try to cultivate the bacillus of cancer. was the discovery that the bacillus grew best upon the prepared stalk of a cabbage that gave Dr. Bra and his assisrecognized the mould which formed upon the cabbage stalk as resembling that to of the growth upon the trees of the evenue showed it to be identical with the growth and then shifts the rest of its body into ture from a person afflicted with cancer

Little Pimples Turn to Cancer.

Cancer often results from an impurity in the blood, inherited from generations back. Few people are entirely free from some taint in the blood, and it is impossible to tell when it will break out in the form of dreaded Can-What has appeared to be a mere pimple or scratch has developed into the most malignant Cancer.

Atlanta Georgia

and not a sign of the disease has returned."

E. F. Williams.

It is dangerous to experiment with Cancer. The disease is beyond the skill of physicians. S. S. S. is the only cure, because it is the only remedy which goes deep enough to reach Cancer. S. S. S. (Swift's Specific) is the only

blood remedy guaranteed Purely Vegetable. All others contain potash and mer-

cury, the most dangerous of minerals. Books on Ouncer and blood diseases mailed free by Swift Specific Company, the plasmodium hanging min let go and Q. T. Atlanta. Georgia.

reached the limit of his endurance in the mpoverished and thinning blood on the larger and quite sluggish, and finally atnached itself to the glass of the siide and died like a warrior.

witnessed. It has long been known that the phagocyte and microbe were antagonets, but the actual battle between them had never been witnessed.

The malaria germ propogates its species by segmentation. Periodically every day, or every three days, or every four days, according to the type of the disease, the full-grown germ sub-divides and each subdivision becomes a full-fledged microbe with full power to reproduce itself. All the germs sub-divide throughout the human body within some minutes of one

EX-COUNCILMAN HANDLEY

Ex-Councilman T. M. Handley, of the West Side, died yesterday morning at 11 o'clock, after an Illness of nearly a year, It is a matter of dispute among physicians as to his aliment. It was thought that he had stomach trouble, but a post mortem examination showed that he either had Bright's disease or some disease of the kidneys, as nearly three gallons of water was taken from his abdominal cavity. Mr. Handley has been a resident of Wichlta for fourteen years, during which time he has been a quiet and respected citizen for whom everybody had the highest regard. He was councilman from the Fifth ward for four years and no criticism was ever offered of his conduct. His funeral will be under the direction of the order I. O. O. F. and will occur at 10:30 Friday morning.

PRESIDENT OF THE FRISCO And a Party of Officials Go Over the

of tracks and bridges, Division Suparin

The special train left for Cherryvale peka. last night President Robinson said that he found business prospects much more encouraging out here than he expected and he thinks the coming year will be full of enterprise and progress for all kinds of business in Kansas and Oklaoma. The party will make a tour of the Oklahoma lines before thi reitra to St.
